**Certus Laboratories** has partnered with your health care provider to proactively monitor medications prescribed through the use of urine toxicology testing.

# DEFINING EXCELLENCE.

Dear Patients,

**Certus Laboratories** has partnered with your health care provider to proactively monitor medications prescribed through the use of urine toxicology testing.

We are an independent urine toxicology laboratory located on the Mississippi Gulf Coast. We specialize in offering health care providers with the most comprehensive results available. Our results help providers monitor medication compliance, detect potential drug-drug interactions, and assist in identifying those patients with abuse problems. Your health care provider has now implemented this testing as a consistent standard practice in order to improve the quality of care that is delivered to patients.

All patients will be asked to participate to ensure the ability to accurately monitor the use of medications prescribed.

**Certus Laboratories** accepts payment from Medicare, Medicaid, and all 3rd party insurance carriers. Patients without insurance are billed a low self-pay rate and provided with payment options. If your insurance company denies payment for our laboratory test, you may receive a bill from us. Please contact our billing department directly for any questions you may have regarding your bill at the following number **774-210-1912**.

Most insurance companies send patients a notification called an Explanation of Benefits or an EOB. **This is not a bill from Certus Laboratories.** This is an explanation of benefits from your insurance company.

**We look forward to offering you and your health care provider with the best customer service available!**
